

Web Hosting

Our Websites are hosted with the latest features:

When you get a website from us, we give you the below listed advantages at no extra cost. You automatically gain access to the top hosting packages available anywhere.

VPS Hosting with FREE SSDs

Works like you have your own machine - powerful, affordable and includes free solid-state drives, a custom firewall, dedicated mail server and more control over security! VPS hosting is a great fit for businesses expecting rapid growth, heavy website traffic or who run highly interactive, dynamic websites. Digital Jungle Hosting partitions a high-performance server into multiple virtual servers, each with a reserved amount of CPU and RAM resources.

Free Solid-State Drives

Solid state drives have several advantages over the magnetic hard drives. The majority of this comes from the fact that the drive does not have any moving parts. While a traditional drive has

drive motors to spin up the magnetic platters and the drive heads, all the storage on a solid state drive is handled by flash memory chips.

Custom Advanced Policy Firewall

In computing, a firewall is a software or hardware-based network security system that controls the incoming and outgoing network traffic based on applied rule set. In computing, a firewall is a network security system that controls the incoming and outgoing network traffic based on applied rule set. A firewall establishes a barrier between a trusted, secure internal network and another network (e.g., the Internet) that is not assumed to be secure and trusted.[1] Firewalls exist both as a software solution and as a hardware appliance. Many hardware-based firewalls also offer other functionality to the internal network they protect, such as acting as a DHCP server for that network.
